

TruBridge™ is truly a different kind of dental restoration.

Rests Comfortably On Your Gums.

Your natural ridgeline and jawline are preserved.

Immediate Results.

You will have a new smile from the first treatment appointment.

One Answer. One Team.

Consultation, treatment, design & full-arch restoration are all done in our own TruBridge Lab to meet the highest standards of quality and performance.

"Imagine feeling like you've never lost your natural teeth, and knowing that you will not suffer the loss of your natural gums or jawline. That is the true feeling of atraumatic dental restoration that TruBridge has made possible."

— Dr. Helena Soomer Lincoln

You'll Love the View of Your Truly Natural Dental Bridge and Smile

Thanks to TruBridge™ you will never look at dental implants the same way again.

As easy as 1-2-3

Three Steps to a Brighter, Truer, New You!

Your journey to a healthy, beautiful smile is just 3 steps away.

1. Extractions & Temporaries

We gently remove your teeth, preserving the natural gums and bone around your teeth to retain the basis of your future smile.

2. Place implants

After tissue regeneration, the implants are placed in the original sockets to support the TruBridge.

3. Placement of TruBridge™

TruBridges are placed on the upper and lower jaw. Your new smile is in place for all the world to see.
